UFO-sight in Nastola

Mirjam Loise, a teacher, tells the following:

On November 10, 1970, I had an experience which altered my attitude to life. When walking with my dog I saw a huge, shining object in the sky. It was like a big moon emerging yellowish light. Its surface was even. It was moving slowly. In order to get witnesses for this event I went to Mr. Virtanen, a well-known weather prophet. I also fetched my son. Together we saw the light object which was now like a huge, bright cloud. Then the cloud lost height, lost some of its light and moved slowly out of sight. We were watching it for about 45 minutes. After this happened I have got really interested in everything concerning UFOs.

Mrs. Virtanen who watched the sight together with her husband tells: The object turned in a circle. It was looking for a place. It was like a round object with clear limits. It had a separate bottom which rose up to the middle. The color could not be discerned, but it was bright. After a while the object moved away making a few movements, it was going in a circle and we were thinking that the motor might have gone wrong and that it was going to descend. A bright light was emerging from it. The light was so bright that it hurt the eyes. In the light there were several colors. There must have been a great heat in the object to give rise to such a strong light.

Strange human beings and lights in Sukevala

Two sisters, Helena (14) and Raija (16) Mankinen have had a strange experience. The girls had a sight on Easter around 9 p.m. When about 150 meters from their home two men dressed in black were approaching them. When they were quite near they suddenly disappeared. At the same time a glowing object with a redish light could be seen. It flew above the tree tops. The girls run home and told their father. When he came to the place nothing could be seen anymore. Their brother Unto (21) saw the same object when returning home in a car. According to people in the village, the Mankinen children are all very reliable. Therefore they do not doubt that they really have had strange visitors from the space in their village.
